CERTIFICATIONS

Developing Solutions
on Azure (AZ-203)

ITIL Foundations Certificate

TRAINING

Developing and architecting on
AWS

Docker Fundamentals

PROFESSIONAL EXPERIENCE

Software Engineer

SUPERFORMULA

2022-present

Building a digital marketplace for car enthusiasts using [GraphQL](#), [TypeScript](#), [Terraform](#) and [Elasticsearch](#) on AWS.

Software Engineer & Startup Advisor

LIBERET / MENU LOCAL

2020-present

Engineer #4 at Liberet, the first food social network in LatAm. Defined the microservices architecture using [TypeScript](#), [gRPC](#), [DynamoDB](#) and the Loopback framework. Created a CircleCI pipeline to build and deploy the [React Native](#) iOS app.

Tech Lead

JABIL

2016-2022

- Technical lead in Jabil's Connected Packaging initiative. Mostly developing in [C#](#) on a microservice event-driven architecture, using [.NET Core](#), [PostgreSQL](#) and [Docker](#) containers on [AWS ECS](#). Leading the Alexa skill development, certification and a dozen of developers working remotely.
- Built a chat-bot using the [Microsoft Bot framework](#) and integrated it into Microsoft Teams. Employees were able to query for corporate information, send emails, and schedule meetings.
- Built a native Apple Watch [Swift](#) application from the ground up. The app reacted to certain hand motion. Used the Core Motion framework, Core Data, and the built-in messaging system for iPhone-Apple Watch communication.

Database Analyst II

JABIL

2013-2016

- Database developer in the global Jabil InControl team, a Gartner award-winning solution on the Supply Chain Innovation category.
- Improved and tuned performance, up to 40x, in the [SQL Server](#) database on procedures hitting +1.2 billion-row tables using columnstore technology.
